

What to Consider When Choosing a **Contract Manufacturing Partner**

For Custom Medical Grade
Skin Solutions

Key Areas for a Successful Partnership

Research and Development

- Collaborates with customers on optimized product designs that accommodate end-user needs
- Provides flexibility for prototyping, testing and fine-tuning of concepts

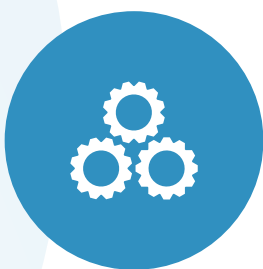

Materials Expertise

- Access to industry leading technology portfolio
- Including skin adhesives, medical grade substrates and premium skin care topical ingredients

Engineering Know-How

- Seasoned team with track record developing high quality medical devices
- Managing projects from inception through to market delivery

Manufacturing Capabilities

- Specialized medical device manufacturing expertise with complete product processes
- Global footprint with dual-sourcing to ensure uninterrupted supply of materials

Quality and Regulatory

- Thorough understanding and experience with global regulatory systems (FDA, CE, EU)
- ISO certifications and robust quality systems support
